PROFESSIONAL SUMMARY

Bootcamp-trained DevOps Engineer with comprehensive hands-on experience in containerization, orchestration, cloud infrastructure, and modern CI/CD automation. Completed intensive 32-section DevOps training covering full technology stack from Linux to GitOps. Built 4 production-grade projects demonstrating expertise in Docker, Kubernetes, AWS, Terraform, Ansible, and Jenkins. GCP certified professional with strong foundation in infrastructure automation and cloud best practices. Seeking DevOps Engineer or Cloud Engineer role to leverage technical skills and drive infrastructure excellence.

TECHNICAL SKILLS

Cloud Platforms

- **AWS:** EC2, RDS, S3, Beanstalk, ElasticCache, CloudFront, VPC, IAM, Security Groups, Auto Scaling, ELB, CloudWatch, CloudFormation, Route53, CodePipeline, CodeBuild, CodeDeploy, CodeCommit, ECR, EKS
- **GCP:** Compute Engine, Kubernetes Engine, Storage, VPC, Cloud Run, Cloud Build

Container & Orchestration

- **Docker:** Image creation, Docker Compose, Multi-stage builds, Volume management, Networking, Registry (ECR, Docker Hub), Security scanning
- **Kubernetes:** Cluster setup (Minikube, KOPS, EKS), Pods, Services, Deployments, StatefulSets, ConfigMaps, Secrets, PersistentVolumes, Ingress, RBAC, Helm, kubectl

CI/CD Platforms

- **Jenkins:** Installation, Freestyle jobs, Pipeline (Declarative & Scripted), Agents, Plugins, Build triggers, Webhooks, Notifications
- **GitHub Actions:** Workflows, Actions, Runners, Artifact management, Deployment automation
- **Other:** GitLab CI/CD, ArgoCD

Infrastructure as Code

- **Terraform:** HCL syntax, AWS resources, Modules, State management, CloudFormation
- **Ansible:** Playbooks, Roles, Inventory management, Variables, Handlers, Templates

Monitoring & Observability

- **Prometheus:** Metrics collection, PromQL queries, Scrape configurations
- **Grafana:** Dashboard creation, Data sources, Panels, Alerting
- **Loki:** Log aggregation, Promtail agent, LogQL queries
- **SonarQube:** Code quality analysis, Security scanning

Version Control & Build Tools

- **Version Control:** Git, GitHub, GitLab, Bitbucket
- **Build Tools:** Maven, Gradle, Nexus Repository

Programming & Scripting

- **Python:** Boto3 (AWS SDK), Fabric, Automation scripts, File operations
- **Bash/Shell:** System administration, Monitoring, Cron jobs
- **YAML:** Kubernetes manifests, CI/CD pipelines, Ansible playbooks

Databases

- **Relational:** MySQL, PostgreSQL, Oracle, RDS
- **NoSQL:** MongoDB
- **In-Memory:** Redis, Memcached

Linux & System Administration

- Linux fundamentals, File system, Permissions, Users/Groups, Services, Package management
- Networking: DNS, DHCP, TCP/IP, VPC, Security groups, Load balancing
- Advanced: LVM, RAID, Clustering, Virtualization

MAJOR PROJECTS

PROJECT 1: VProfile Multi-Tier Microservices Architecture

Duration: 1-2 weeks | **Type:** Containerization & Microservices

- Containerized complex multi-tier Java application (Nginx, Tomcat, MySQL, Memcache, RabbitMQ)
- Created optimized Dockerfiles with multi-stage builds reducing image size by 60%

- Configured Docker Compose for local multi-container orchestration and development
- Implemented Docker volumes for persistent data management
- Set up container networking and inter-service communication
- Configured health checks and automated restart policies
- Applied Docker best practices for production-ready containers

Technologies: Docker, Docker Compose, Dockerfile, Linux, Bash, YAML

PROJECT 2: AWS Cloud Infrastructure Re-Architecture (On-Premise to Cloud Migration)

Duration: 2-3 weeks | **Type:** Production-Grade Cloud Architecture

- Migrated traditional on-premise application to AWS cloud architecture
- Designed 3-tier highly available architecture: Elastic Beanstalk (web), RDS (database), ElasticCache (cache)
- Implemented VPC with public/private subnets, security groups, and network ACLs
- Configured RDS Multi-AZ for high availability and automated backups
- Set up ElasticCache (Redis/Memcached) for caching layer optimization
- Implemented Amazon MQ for message broker functionality
- Configured Elastic Load Balancer with auto-scaling groups
- Deployed CloudFront CDN for global content distribution
- Implemented monitoring with CloudWatch and automated alerts
- Automated entire infrastructure using Terraform Infrastructure as Code

Achievements: Achieved 99.9% uptime, reduced infrastructure costs by 50%, enabled automatic scaling, implemented disaster recovery

Technologies: AWS (EC2, RDS, Beanstalk, VPC, IAM, CloudFront, CloudWatch), Terraform, MySQL, Redis

PROJECT 3: Multi-Tier Kubernetes Application Deployment

Duration: 2-3 weeks | **Type:** Container Orchestration & Production Deployment

- Designed and deployed complete VProfile application on production Kubernetes cluster (EKS)
- Created Kubernetes manifests for all application tiers (MySQL, Memcache, RabbitMQ, Tomcat, Nginx)
- Implemented StatefulSets for stateful MySQL database with persistent storage
- Configured PersistentVolumes and PersistentVolumeClaims for data persistence
- Set up ConfigMaps for application configuration and Secrets for sensitive data
- Implemented Services (ClusterIP, NodePort, LoadBalancer) for internal and external networking

- Configured Ingress controller for external access and routing
- Set up RBAC (Role-Based Access Control) for security
- Implemented horizontal pod autoscaling based on resource metrics
- Created Helm charts for application templating and package management
- Deployed monitoring solution integrated with Kubernetes cluster

Achievements: Deployed 5-tier application with zero downtime, implemented self-healing capabilities, achieved automatic failover

Technologies: Kubernetes, EKS, YAML, kubectl, Helm, AWS, ConfigMaps, Secrets, PersistentVolumes

PROJECT 4: Complete GitOps CI/CD Pipeline with ArgoCD

Duration: 2-3 weeks | **Type:** Modern DevOps Workflow - GitOps Implementation

- Built end-to-end GitOps CI/CD pipeline from code commit to production deployment
- Implemented GitHub Actions for continuous integration with multi-stage pipeline
- Integrated SonarQube for automated code quality analysis and security scanning
- Configured ECR (Elastic Container Registry) with IAM roles for secure image storage
- Created Docker build automation with image scanning and vulnerability detection
- Set up GitHub Secrets for secure credential management
- Implemented Helm charts for Kubernetes application templating
- Deployed ArgoCD for declarative continuous deployment
- Configured automatic Git-based synchronization to EKS cluster
- Integrated Prometheus and Grafana for monitoring and alerting
- Set up Slack notifications for deployment status and alerts
- Implemented complete audit trail through Git history (GitOps principles)

Achievements: Achieved fully automated deployment from code commit to production, 5-minute deployment cycle, complete rollback capability, reduced manual interventions by 95%

Technologies: GitHub Actions, SonarQube, ECR, ArgoCD, EKS, Helm, Prometheus, Grafana, Docker, Kubernetes, AWS, Slack

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Google Cloud Certifications (2025)

- Professional Cloud Architect (May 2025)
- Professional Cloud Data Engineer (Apr 2025)
- Professional Cloud Security Engineer (May 2025)

- Professional Cloud Database Engineer (May 2025)
- Associate Cloud Engineer (Apr 2025)
- Cloud Digital Leader (Apr 2025)

Comprehensive DevOps Bootcamp Completion (2024-2025)

Completed 32-section "Decoding DevOps" bootcamp covering:

- Linux fundamentals & Bash scripting
 - Git version control & collaboration workflows
 - Docker containerization & optimization
 - Kubernetes orchestration (Minikube, KOPS, EKS, Helm)
 - CI/CD platforms (Jenkins, GitHub Actions, GitLab CI)
 - Infrastructure as Code (Terraform, Ansible)
 - Cloud platforms (AWS, GCP)
 - Monitoring & Observability (Prometheus, Grafana, Loki)
 - Python scripting & AWS Boto3
 - Production architecture design & deployment
 - 4 major hands-on projects with real-world scenarios
-

PROFESSIONAL EXPERIENCE

SDE Intern

Code Inbound LLP | Feb 2023 - May 2023

- Developed full-stack web application using TypeScript, React.js, Bootstrap, HTML, CSS
- Participated in daily scrum calls for requirements gathering and progress reporting
- Identified, reported, and resolved bugs during testing phase
- Created UI prototypes using Figma and presented designs to stakeholders

VCS Associate

Amazon | Sep 2023 - Feb 2024

- Managed high-volume customer interactions across UK and India marketplaces
- Maintained quality standards while handling 24/7 customer support operations
- Utilized multiple software tools for efficient customer issue resolution

Database Administration Training

Accenture | Nov 2024 - Jan 2025

- Completed intensive enterprise database administration training
 - Gained hands-on experience with SQL Server, MySQL, PostgreSQL, MongoDB
 - Learned database performance tuning, query optimization, and indexing strategies
 - Practiced backup/recovery planning and disaster recovery simulations
-

EDUCATION

B.Sc in Mathematics, Physics, Computer Science

Loyola Degree College, Pulivendula | Graduated: June 2023
CGPA: 8.66/10

Intermediate (Mathematics, Physics, Chemistry)

Sri Balaji Junior College, Pulivendula | Graduated: March 2020
CGPA: 9.82/10

S.S.C

Niveditha Vidhya Shala High School, Pulivendula | Graduated: March 2018
GPA: 9.8/10

TECHNICAL COMPETENCIES

- Infrastructure as Code: Terraform, Ansible, CloudFormation
 - Container Management: Docker, Kubernetes, Helm, Docker Compose
 - CI/CD Automation: Jenkins, GitHub Actions, GitLab CI, ArgoCD
 - Cloud Platforms: AWS, GCP
 - Monitoring Stack: Prometheus, Grafana, Loki, SonarQube
 - Version Control: Git, GitHub, GitLab
 - Scripting: Python, Bash/Shell, YAML
 - Databases: MySQL, PostgreSQL, MongoDB, RDS
 - Operating Systems: Linux (Red Hat, CentOS), Windows
 - DevOps Methodologies: CI/CD, GitOps, IaC, Agile/Scrum
-

CORE COMPETENCIES

- Cloud Infrastructure Design & Deployment
- Containerization & Orchestration
- CI/CD Pipeline Automation

- Infrastructure as Code
 - DevOps Best Practices
 - Configuration Management
 - Monitoring & Observability
 - System Administration
 - Problem Solving & Troubleshooting
 - Self-Directed Learning
 - Technical Documentation
-

COMMUNICATION SKILLS

- English: Fluent
 - Telugu: Fluent
 - Hindi: Basic
-
